## Severn Trent Services Announces New Chlorination / Dechlorination Tablet Feed Systems Capability Brochure

*Brochure describes the company's line of erosion chlorination and dechlorination systems and SANURIL<sup>®</sup>, AQUAWARD<sup>®</sup> and D-CHLOR<sup>™</sup> tablets.*

FORT WASHINGTON, Pa. – January 11, 2010 – [Severn Trent Services](http://www.severntrentservices.com) has released a technical brochure detailing their line of chlorination and dechlorination tablet feed systems, highlighting the systems' ability to eliminate the need to mix chemicals on site, prepare chemical solutions or store and handle toxic gases. Severn Trent Services' erosion [tablet feed systems](#), accommodating treatment capacities up to 50,000 gpd (189.3 m<sup>3</sup>/day), are specifically designed for dispensing the company's SANURIL<sup>®</sup> and AQUAWARD<sup>®</sup> chlorination tablets and D-Chlor<sup>™</sup> dechlorination tablets. The tablet feed systems are ideal for water and wastewater treatment applications at housing developments, rural drinking water systems, schools, motels, offshore drilling platforms, cruise ships and more.

SANURIL chlorination tablets safely and easily provide a calcium hypochlorite and bromine disinfection agent formulated for wastewater treatment applications, while AQUAWARD chlorination tablets provide a highly effective disinfection agent for drinking water treatment. D-Chlor dechlorination tablets are ideal for use in applications that do not require a chlorine residual prior to discharge.

More information on Severn Trent Services' line of erosion chlorination and dechlorination systems and tablets can be obtained by contacting Diane Vega at +1 281-240-6770 or [dvega@severntrentservices.com](mailto:dvega@severntrentservices.com).

### About Severn Trent Services

Severn Trent Services ([www.severntrentservices.com](http://www.severntrentservices.com)), with global headquarters in Fort Washington, Pa., USA, is a leading supplier of water and wastewater solutions.
