Severn Trent Services to Showcase Water Purification Technologies, Operating Services and Analytical Services at Sustainability/live!

BIRMINGHAM, U.K. – 16 May 2011

[Severn Trent Services](http://www.severntrentservices.com), a leading global provider of water and wastewater solutions, will showcase its full line of analytical services, water purification technologies and operating services at IWEX - a part of [Sustainability/live!](http://www.sustainabilitylive.com) - from 24th - 26th May 2011, in Birmingham, United Kingdom. The exhibition is the leading U.K. event for water, wastewater and environmental solutions. The event marks the first time Severn Trent Services will showcase its full suite of services together.

The following products will be featured during the exhibition at stand E26:

Water Purification: Severn Trent Services' line of water and wastewater filtration and disinfection products includes [TETRA[®] LP Block dual parallel underdrain filters](#) for drinking water applications. The technology ensures low headloss and features lightweight construction and easy installation either as a retrofit or for new filter underdrain applications. Other water treatment technologies include [Capital Controls[®]](#) gas feed, instrumentation and chlorine dioxide generators as well as alternative disinfection solutions such as [ClorTec[®] on-site hypochlorite generators](#) and [MicroDynamics[®] microwave UV disinfection](#).

Operating Services: The company provides water and wastewater plant operation and maintenance services and cost and compliance management services to utilities and industrial, commercial and public sector organisations throughout the United Kingdom and the Republic of Ireland. Services include asset design, build, operation and maintenance; drainage, water and conveyancing searches; meter installation and repair; network laying and maintenance; new service connections; system cleaning and disinfection; water and wastewater treatment; water demand management; and water hygiene risk assessments and control.

Analytical Services: Severn Trent Services provides one of the most extensive ranges of accredited environmental analysis in the United Kingdom. Providing both laboratory and in-field services for water, wastewater, land and waste testing, the company has extended its range of [MCERTS accredited analysis](#) for sampling and chemical testing of water. Severn Trent Services has been granted MCERTS accreditation for sampling untreated and treated sewage effluent at wastewater treatment works and for on-site testing of these samples for pH and conductivity.

According to Tom Mills, vice president, marketing and business development, "Severn Trent Services is expanding our presence at IWEX this year to better reflect the comprehensive scope of our water and wastewater solutions. Globally, we are helping to solve some of the most
