Severn Trent Services to Unveil Complete Chlorination Solution at ACE 2014

FORT WASHINGTON, Pa., USA – 20 May 2014

Severn Trent Services, a leading global supplier of water and wastewater treatment solutions, will showcase its new Chlorination Solution package at AWWA’s ACE 2014. The company will unveil its new Chlorination SAFE Station (CSS), an all-inclusive gas feed system that relieves the design burden of the end user while increasing safety. The CSS is composed of an insulated fiber-reinforced plastic (FRP) building, gas feed equipment, gas detectors, scales, scrubber, controls and safety equipment.

The FRP building stores up to 15 cylinders in any combination of containers: operating, standby and empty. The CSS includes a 150-pound, low-profile EST™ type DHS 400 dry emergency chlorine scrubber engineered to treat accidental gas releases of chlorine/sulphur dioxide at a leak rate in accordance with Uniform Fire Code requirements while constantly maintaining a negative pressure in the cylinder storage room. The basic design of the CSS offers customizable options to address customers’ needs.

Visitors to booth 2630 will also find a broad range of disinfection and filtration technologies including the award-winning ClorTec® on-site sodium hypochlorite generation systems, TETRA® potable, tertiary and biological filtration technologies and Capital Controls® gas feed disinfection systems.
